

# openMDX

## Developers Workshop

---

### Content

In this workshop you learn how to develop, deploy and maintain openMDX based applications ([www.openmdx.org](http://www.openmdx.org)). The workshop gives an introduction to the openMDX fundamentals such as MDA, J2EE and JDO. The workshop is hands-on. You will work through a fully working example on your laptop.

---

### Prerequisites

Basic J2EE and UML class diagrams.

---

### Infrastructure

- Java 2 SDK, Standard Edition, Version 1.4.2
- Apache Ant, Version 1.6.5
- Apache Tomcat 5.0.28
- Eclipse SDK, Version 3.1.2
- Sysdeo Eclipse Tomcat Launcher plugin, V3.1
- JBoss Application Server 4.0.4
- One of the following databases: PostgreSQL, MySQL, Oracle
- One of the following modeling tools: Rational Rose, Rose Enterprise Edition, Version 2003, Rational Software Modeler, Version 6.0.1

---

### Documentation

- Fully working openMDX project delivered as distribution containing:
  - Sources (Models, Java, DB scripts)
  - Ant and Eclipse project files
  - Slides for each lesson

---

### Participants

max. 5

---

### Duration

3 days

---

### Fees

The fee for the workshop is EUR 3,450 / USD 3,990 (plus 7.6% Swiss VAT), payable at registration.  
Corporate Discount: save 25% if you register 2 or more employees from the same company at the same time.
